

# RH277 PRESSURE REGULATOR

|                             |                        |
|-----------------------------|------------------------|
| Reduction stages            | 2                      |
| Gas                         | Hydrogen               |
| Max. inlet pressure         | 700 bar                |
| Outlet pressure range       | 5 - 12 bar             |
| Weight                      | 0,8 kg                 |
| Dimension                   | Φ58 x 180 mm           |
| Typical port size inlet     | 9/16"-18 UNF           |
| Typical port size outlet    | 9/16"-18 UNF           |
| Second outlet port          | M12x1 or 1/8" optional |
| Sensing element             | Piston                 |
| Pressure relief valve (PRV) | Yes                    |
